Projects

Orbiit – InQubate Pitch Competition 2nd Place Winner, March 2026 | Javascript, Node.js, React, Vite, Supabase

- Built a full-stack lost & found web platform for students, competing against peers to pitch the product to a panel of judges
- Architected a Node.js backend with a Supabase database to manage item listings, search queries, and data persistence across the platform

Tackl, March 2025 | HTML, Javascript, Node.js, Gemini API

- Collaborated with 2 developers to build a Chrome extension to automatically summarize terms and conditions
- Integrated the Gemini API to process lengthy agreements and return plain-language summaries to users

FindMyBird, January, 2025 | Node.js, Javascript

- Developed backend services for FindMyBird, integrating the eBird API to fetch real-time bird sighting data
 - Implemented data processing and filtering logic to deliver accurate, location-based results efficiently
-

Experience

First Year Marketing Intern for Queen's Women in Computing | Kingston, ON | 2024 - 2025
